Select your GigaSpire

Select your GigaSpire

Start Set Up

Place Router

Power it up

Step 4 of 7

Connect ethernet cable

Wait for the LED light to begin flashing red, then connect the ethernet cable from the ethernet/LAN port on your existing device to the port noted on the image below to your new system.

Next

Connect ethernet cable

Step 4 of 7

Connect ethernet cable

Wait for the LED light to begin flashing red, then connect the ethernet cable from the ethernet/LAN port on your existing device to the port noted on the image below to your new system.

Wait about 10 min

Step 5 of 7

Confirm connection

Your new system may need a software update. If this happens, the LED light will change from green to amber or red temporarily, and then back to green. Please wait to confirm the LED light remains green before proceeding. A solid green light indicates a successful connection.

Next

I don't see a green light

Check your light status
green means good to go

Step 5 of 7

Confirm connection

Your new system may need a software update. If this happens, the LED light will change from green to amber or red temporarily, and then back to green. Please

Troubleshooting

1. Check that the ethernet cable is plugged into the correct port.
2. If all cables are correct, try unplugging the power and ethernet for 1 minute. Wait a few additional minutes for the system to connect.

System Light Status

● System has successfully booted up, local services are up, and internet connection is established.

● Flashing amber means that the system is in the process of booting up. Wait a few minutes for it to connect.

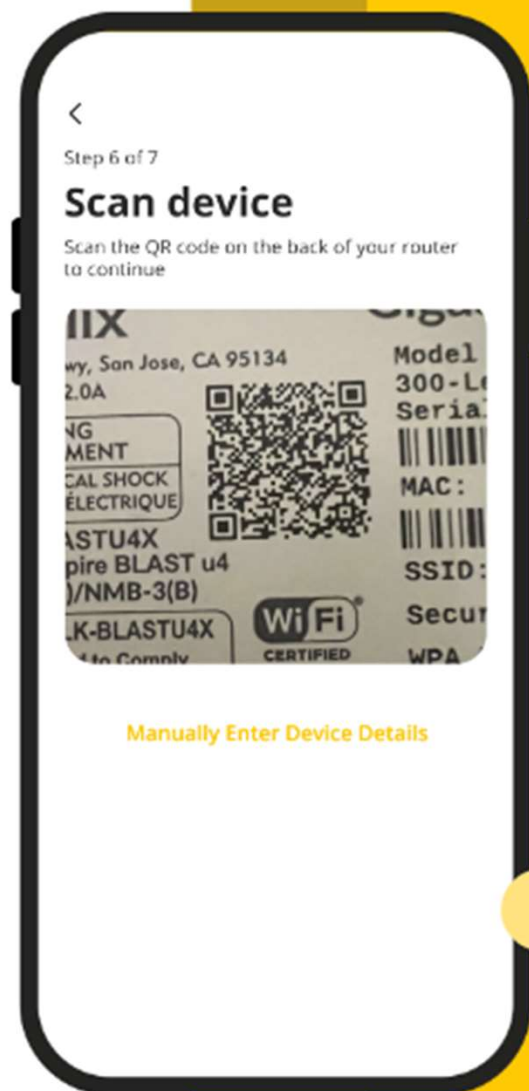

● Solid red indicates that boot-up failed or there is no internet service. Try unplugging your device and connecting again.

● The system has successfully booted up and an internet connection is established. The system software needs to be updated.

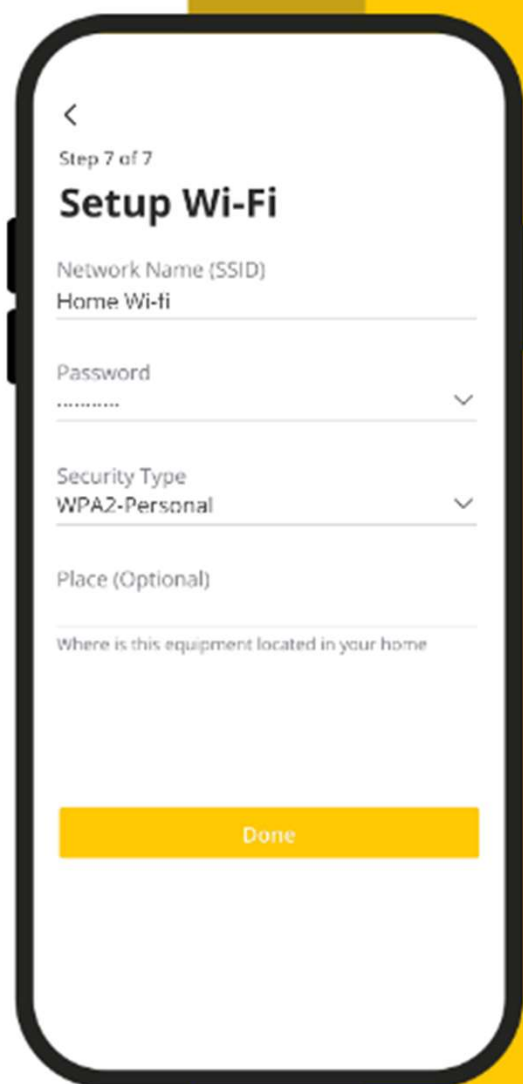

Contact your service provider if you need further assistance.

Set up your Wi-Fi
network and password

A smartphone screen displaying the 'Setup Wi-Fi' screen. The screen is white with a black border. At the top left is a back arrow. Below it is the text 'Step 7 of 7'. The main title is 'Setup Wi-Fi'. There are three input fields: 'Network Name (SSID)' with the value 'Home Wi-fi', 'Password' with a masked password '.....', and 'Security Type' with the value 'WPA2-Personal'. Below these is an optional section 'Place (Optional)' with the text 'Where is this equipment located in your home'. At the bottom is a yellow button labeled 'Done'.
